Dear David

Elephant Pump

On behalf of Pump Aid, I write to extend sincere thanks for your donation of £1,000 in return for the accounting services supplied to 'The Worked All Britain Awards' by Andy Thorpe. This is so invaluable to us, and we cannot thank you enough.

Pump Aid has had a very successful year so far and we look forward to continuing our work as we carry on expanding our operations. We have a number of exciting projects that will come to fruition this year, including a new Schools Sanitation programme.

To give you an idea, typically we will install an Elephant Pump at a poor rural school along with improvements to their sanitation facilities and establishment of a nutrition garden. We train the staff, children and local community on how to maintain the pumps and on relegated areas such as agriculture, health and hygiene. We then build pumps in four or five villages around the school so that children have clean water at school and at home.

When we choose a site to build one of these village pumps, we often choose a child headed homestead where the parents have already died from AIDS. These AIDS orphans are currently marginalised even by other villagers who fear catching AIDS and also see the orphans as a problem since such children may be forced to steal grain in order to survive.

In recognition of your tremendous support, I am delighted to enclose a certificate of pump sponsorship. Your pump will have such a life changing, positive impact for so many people. Over 500 children and adults will benefit every day, and we cannot thank you enough. Also enclosed is an factsheet for your perusal.

From All who will benefit from their new pump, I send heartfelt thanks and blessings.

With warm regards

Karen Mercer
Sponsorship Co-ordinator
